APPLICATION GUIDE

SURFACE PREPARATION

Use one of the following recommendations:

- Prepare surface in accordance with SSPC –SP 1 (solvent cleaning)
- Prepare surface in accordance with SSPC -SP 5 (white metal blast cleaning) for immersion 2)
- Prepare surface in accordance with SSPC -SP 6 (commercial blast cleaning) for better chemical resistance
- Direct to metal coatings achieve maximum performance over near white blasted surfaces in accordance with SSPC -SP 10

Note: Polyur top coat should be applied over this epoxy for any outdoor use.

MIXING AND THINNING

To obtain a smooth homogenous product, both part A and part B should be mechanically mixed together.
